

Patco Industries, Inc.

SINCE 1984

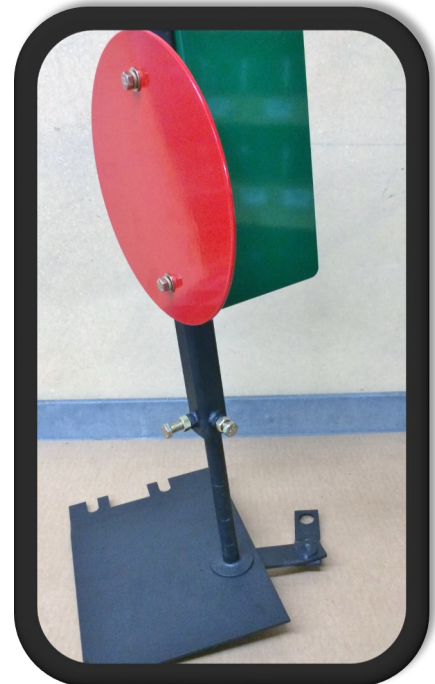

Temporary Switch Flag Indicator

Patco Industries' Temporary Power Switch Target is for use to show the alignment of a power switch when power is not yet available.

Patco Industries' Temporary Power Switch Target can be used with either Alstom Model 5 machines and US&S M style machines.

Once you have a target for a Alstom machine, if a US&S M style is needed the plates interchange so a whole new target is not required just the bottom plate.

The target is attached simply by connecting the arm of the target to the switch pawl.

- *Target can extend from 16" - 30", measured from top of target to base*
- *Target is powder coated, black for the base, red and green for the actual target with a reflective clear coat applied for longer durability than stickers.*
- *Can be used with either Alstom Model 5 or US&S M style switch machines and easily converted with just a change of the base.*
